

CURRENT CONTAINER INSPECTION PRACTICES IN VIET NAM

Samut Prakan - Thailand, September 13-15, 2022

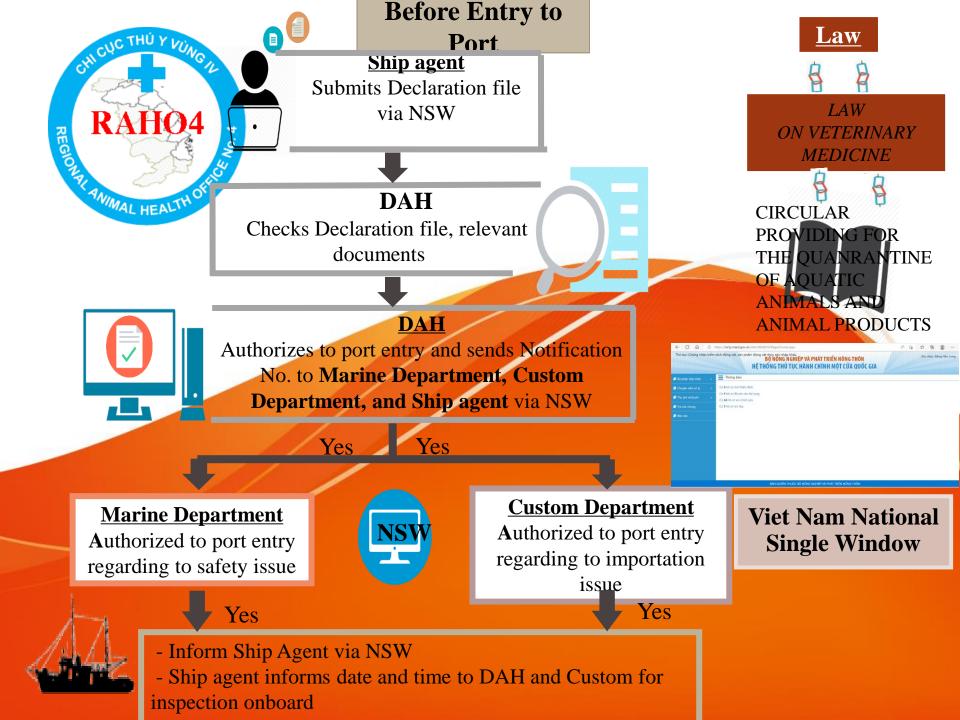

Actual situation of controlling Fish and Fisheries Product in containers imported into Vietnam

- In the first 6 months of 2022, the total amount of fisheries product from wild catches imported into Vietnam, packed in containers, is about 51,507.75 Tons (In which 21,004.60 tons are transported and packed at the transshipment port; 30,503.15 tons have been processed and certified by the authorities of the exporting country).
- Purpose: as raw material for the production of export goods.
- Animal products and fisheries products, when imported into Vietnam, are controlled by regulations on quarantine of animals and animal products.

REGIONAL

CHALLENGES

- According to Vietnam's regulations, fisheries products imported for the purpose of producing goods for export will not be prioritized for inspection.
- Therefore, we only check the profile mainly.
- But, from September 11, 2022, all fisheries products imported into Vietnam for the purpose of making raw materials for export production are exempted from specialized inspection. This is also a diffculty in IUU control.

THANK YOU FOR YOUR ATTENTION!
